

Glass floors

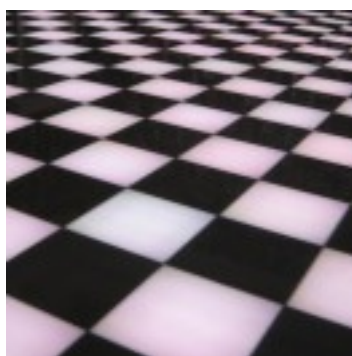

[1]

A glass floor is a unique solution – for bold and imaginative users. A glass floor may rest on a concrete floor or be suspended on a visually lightweight mezzanine. It may be transparent or “smoky”, colorful, glossy, or patterned.

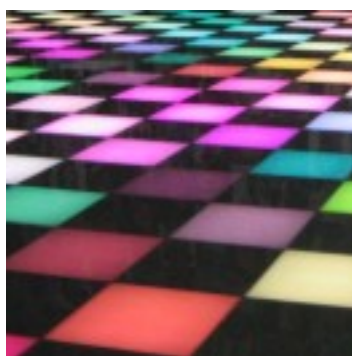

Thanks to our broad experience in supplying glass to those who want to build glass floors and ceilings, we can offer a wide range of solutions and ideas. In such projects, our glass ensures safety, comfortable use and a thrilling experience.

In floors, we most often use 3-layer laminated safety glass (tempered and semi-tempered), also combined with annealed glass (e.g. 101010.44). Dubiel Vitrum also produces fireproof glass for fireproof ceilings in the fire class REI60 (according to PN-EN 1365).

Below are the photos of example projects with glass floors and ceilings.
